

6.0 Product Programme

At the site in Oldesloe Hako produces and assembles custom-made solutions for almost any use, e.g.

Sweepers for dust free cleaning inside and out. With different drives and area performances up to 18.000m² cleanliness per hour or,

Wet and Dry Machines for intensive wet cleaning of hard floors; for use by hand or comfortably sitting down

Furthermore there are **City Cleaning Machines** for pedestrian precincts, paths and other public places.

In addition the **Hako Advantage Programme** (HAP) offers further interesting purchasing options to the keen customer e.g. to acquire quality used models plus computer supported cost/benefit analysis, round the clock service and so on...
